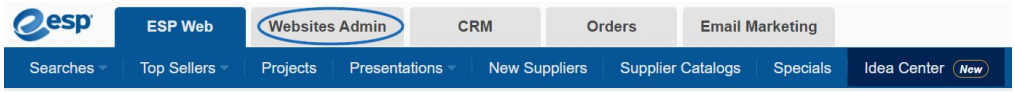
# ESP Quick Tip # 20: Look up a CPN without ESP Web

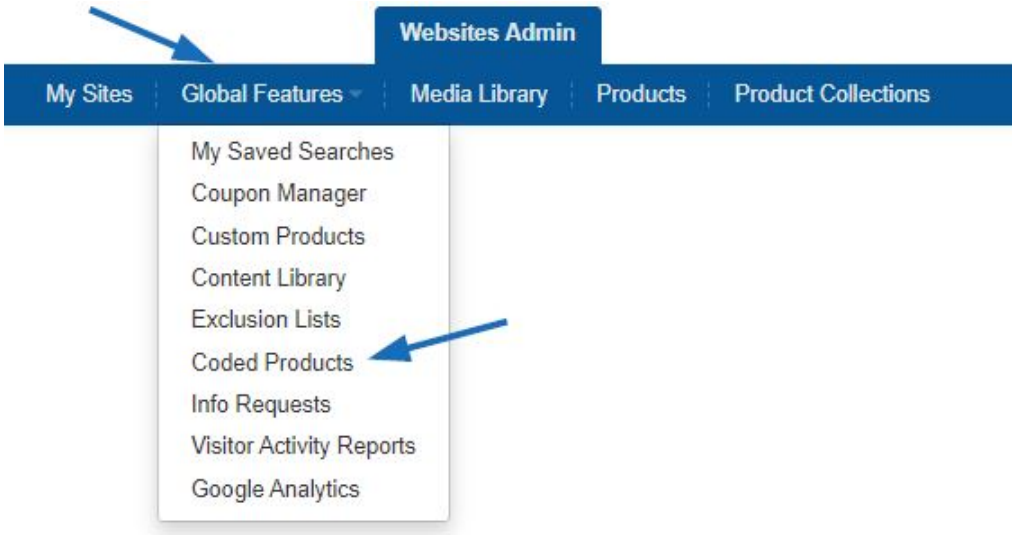
2021-09-17 - Jennifer M - ESP Quick Tips

Need to look up the supplier for a coded product number (CPN) but don't have an ESP Web license? Good news! You can source a CPN via the ESP Websites Admin. To do this, take the following steps:

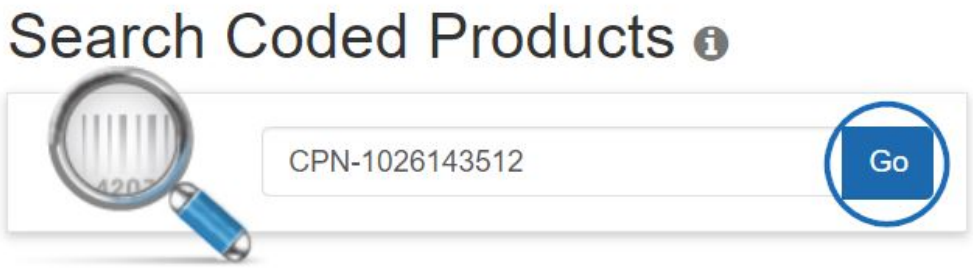
1. Go to the ESP Websites Admin area available via https://admin.espwebsite.com.



2. From the toolbar at the top, click on Global Features and select Coded Products.



3. Enter the Coded Product Number. For example, "CPN-200950371". You will have to include the "CPN-" and the number in the search box. Then, click on Go.



4. The product will be displayed in the Detail view with all information, including the real product number and supplier information.
