

## ESP Web Shipping Estimator

Tamika C - 2019-09-06 - Ordering & Inventory

The Shipping Estimator provides estimated shipping costs from various postal carriers (UPS, DHL, USPS, FedEx). Only carriers that service the location you enter in the Ship To and Ship From fields will display shipping estimates. The shipping estimate calculation is based on the unit weight per product and each carrier type.

On the Product Detail page, you will see a link for the Shipping Estimator below the Create Order button.

The screenshot shows a product detail page for a blue mug. On the left is a large image of the mug with the text 'YOUR LOGO HERE' and arrows pointing to the logo area. Below this is a smaller image of two mugs. To the right of the mug image is a list of product specifications: Colors (Cobalt Blue), Sizes (13 oz), Imprint Methods (Silkscreen, Decal), Production Time (10 business days), Materials (Glass), and FOB/Shipping Point (Trevose, PA 19053 USA). Further right is a supplier information box for 'ASI Supplier Company' with a link to 'asi/12345', 'Not Rated' status, 'E-Comm Connected' badge, phone number '(555) 555-5555', and links for 'Website' and 'Email'. Below the specifications is a 'Create Order' button. Below the 'Create Order' button is a link 'Estimate Shipping | Compare' with a blue arrow pointing to it. At the bottom left is a 'Create a Virtual Sample' button.

If the supplier has provided the item or package weight, the information will be auto generated in the Products per Package and Weight per Package boxes. The total pounds and number of packages will be calculated after you click on the Get Estimates button.

The Ship From will display the supplier's location and Ship To will display the location saved within your ESP account, but both are adjustable. When you are ready, click on the Get Estimates button.

16 oz. Bistro Ceramic Mug  
 Product #: DWUUS5003 Last updated: May 14, 2019  
 CPN-559981293
