## Supplier Specials in ESP Web

Jennifer S - 2019-07-28 - in ESP Web

Looking for free shipping or EQP? ESP makes it easier than ever with the Supplier Specials feature!

Suppliers can create and manage their own specials on ESP.

To access Supplier Specials, use the Specials option from the taskbar. All products that have been assigned to a special will be displayed.

Distributors will be able to use the guided navigation to narrow down to specific types of specials. For example, to view only products that have free setup, click on that option from the Specials section.

Distributors can also search only for products that are on special by entering keywords in the "Search Within" box of the guided navigation.
