

ESP Quick Tip #16: Exact Phrase Search on ESP Websites

2021-08-24 - Jennifer M - ESP Quick Tips

When searching for items on an ESP Website, some products require more than one word to accurately describe them. For example, a search for safety glasses will search independently for both these keywords within the product information. This means that the search results will contain products that match either safety or glasses, as well those who contain both; so while you will see the protective eyewear products, they will be mixed in with drinking glasses, novelty glasses, safety vests, and a wide variety of other items.

To search for specific products more efficiently, you are able to use quotations to designate an exact phrase. Using the same example, a search using quotations for “safety glasses” will return only results which have both words in that order, also known as an exact phrase, within the product information.

Let's check out three different examples to see the exact phrase in action:

The screenshot shows a website header with navigation links: Home, About Us, Products, News & Videos, Event Planner, Contact Us, Sign in, and Create Account. Below the header is a search bar containing the text "safety glasses". To the left of the search bar is a "Company Logo" with a blue arrow pointing to it. To the right of the search bar is a search button with a magnifying glass icon and a shopping cart icon. Below the search bar is a contact information section with a phone icon and the number "(800) 546-1350" and an email icon and the address "support@asicentral.com". Below the search bar, the search results are displayed. A blue arrow points to the search bar. The results section shows "4,753 item(s) are found". Below this is a "Your Search Terms" section with "x safety glasses" and "Clear All". To the right of this section are pagination controls (1 2 3 4 5 > >>), "Items per Page: 20", and "Sort By: Best Matched". Below these controls are four product images: a knife, a pen, two glasses (one red, one blue), and a pair of safety glasses.
