## What's New in ESP

2019-03-06 - Jennifer S - in General

### Company Stores Updates

- [New Site Builder](#)
- [Enhancements to User Companies](#)

### ESP Web Updates

- [Exceptions Added to Preferred Supplier Pricing](#)

### ESP Orders Updates

- [Additional Information Included in QuickBooks Sync](#)
- [Email Type Shown on Sample and Catalog Requests](#)
- [Sample Requests will autofill with Designated Shipping Address](#)

---

### New Site Builder

[Building a new company store](#) is now a more streamlined process, which helps distributors save time as they build sites for their customers. Distributors can select a template, color scheme, and company for their customer's site. In addition, you can create a domain name, upload their logo, and select a product collection.

---

### Enhancements to User Companies

In the Companies section of the Manage Users, there is a checkbox that "All users that create an account must belong to the Company below".

## Companies

Select the Company that will use this Store.

All Users that create an Account must belong to the Company below.

When users create an account on a company store, any companies in this section will be available for selection. If there is only one company, the field will be automatically filled in during the account creation process.

### Create Account

### Exceptions Added to Preferred Supplier Pricing

When setting preferred supplier pricing, there is now the option to establish exceptions based on product category, brand(s), or quantity. For example, if a supplier has offered EQP on all their products, except for backpacks and bags, this exception can be established in the [Preferred Supplier and Notes Admin](#). In the Rank & Price window, there is a dropdown for exceptions where you can select Categories and then enter the specific categories that should be excluded from EQP.
