

## ESP Quick Tip #37: End-Buyer Safe and Client Safe Mode

2022-05-19 - Jennifer M - ESP Quick Tips

There are two modes available in ESP that hide sensitive information: Client Safe Mode and End Buyer Safe options. But, what is the difference between these two options?

- **End Buyer Safe**

The "End Buyer Safe" option refers to controlling which fields are displayed in the product search results, replacing the supplier's product number with the coded product number while simultaneously hiding the supplier's information and net cost.

The screenshot shows the ESP product search interface. At the top, there are navigation tabs: Websites Admin, CRM, Orders, Email Marketing, Projects, Presentations, New Suppliers, Supplier Catalogs, Specials, and Idea Center (New). Below these are search filters for Products, Price, and Quantity, with a Search button and an Advanced Search link. The main content area shows search results for 'Products (3)'. The results are displayed in a list view, sorted by Default. Each result includes a product image, title, supplier information, and pricing details.

Product	Supplier	Price	Cost
T-Shirt	ASI Tech Training	1 @ \$20.00	1 @ \$10.00
Ceramic Mug - US and CAD Pricing	ASI Tech Training	12 @ \$5.00 (R)	12 @ \$3.00
Ceramic Mug - US Only Pricing	ASI Tech Training	12 @ \$5.00 (R)	12 @ \$3.00

- **Client Safe Mode**

Client Safe Mode will also hide the supplier's information and net cost from product search results, but the product number will remain. However, client safe mode also hide all supplier related from ESP, including Supplier Search, New Suppliers, and Supplier Catalogs.
