

## Configure a Product for Order

Jennifer M - 2019-09-12 - Ordering & Inventory

When ordering a product within ESP, you will need to configure. Depending on the item's attributes, you may have to select specific options. For example, a T-Shirt may have different options, such as colors or sizes, from which you will need to choose prior to being able to enter the quantities.

After making selections, you will need to enter the quantity for each available option in the box below the attribute. The Order Summary will appear to the right, displaying the total product cost, price, and margin. After entering the quantities for options you would like to order, click on the Continue button.
