

ESP Quick Tip # 20: Look up a CPN without ESP Web

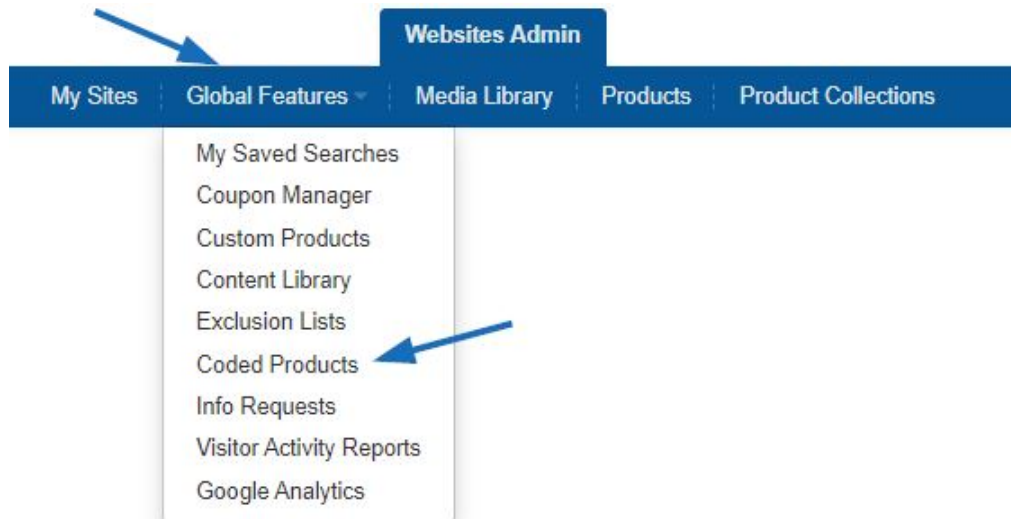

2021-09-17 - Jennifer M - ESP Quick Tips

Need to look up the supplier for a coded product number (CPN) but don't have an ESP Web license? Good news! You can source a CPN via the ESP Websites Admin. To do this, take the following steps:

1. Go to the [ESP Websites Admin](https://admin.espwebsite.com) area available via <https://admin.espwebsite.com>.

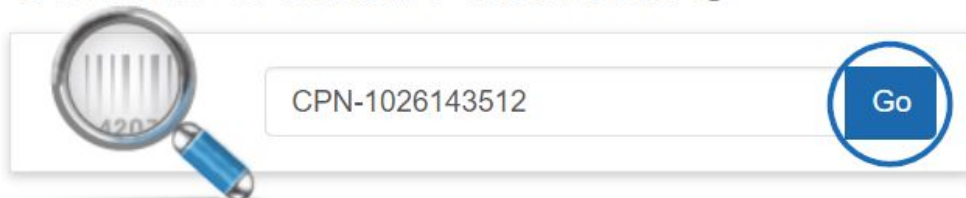

2. From the toolbar at the top, click on Global Features and select Coded Products.

3. Enter the Coded Product Number. For example, "CPN-200950371". You will have to include the "CPN-" and the number in the search box. Then, click on Go.

Search Coded Products

4. The product will be displayed in the Detail view with all information, including the real product number and supplier information.
