

ESP Quick Tip #37: End-Buyer Safe and Client Safe Mode

2022-05-19 - Jennifer M - ESP Quick Tips

There are two modes available in ESP that hide sensitive information: Client Safe Mode and End Buyer Safe options. But, what is the difference between these two options?

• End Buyer Safe

The "End Buyer Safe" option refers to controlling which fields are displayed in the product search results, replacing the supplier's product number with the coded product number while simultaneously hiding the supplier's information and net cost.

The screenshot displays the ESP product search interface. At the top, there are navigation tabs: Websites Admin, CRM, Orders, and Email Marketing. Below these are more tabs: Projects, Presentations, New Suppliers, Supplier Catalogs, Specials, and Idea Center (New). A search bar contains 'Products', 'Price', and 'Quantity' fields, with a 'Search' button and an 'Advanced S' link. The search results are displayed in a list view, showing three products:

Product Name	Supplier	Product Number	Price	Cost
T-Shirt	ASI Tech Training	CM1216	1 @ \$20.00	1 @ \$10.00
Ceramic Mug - US and CAD Pricing	ASI Tech Training	CM1216	12 @ \$5.00 (R)	12 @ \$3.00
Ceramic Mug - US Only Pricing	ASI Tech Training	CM1216	12 @ \$5.00 (R)	12 @ \$3.00

• Client Safe Mode

Client Safe Mode will also hide the supplier's information and net cost from product search results, but the product number will remain. However, client safe mode also hide all supplier related from ESP, including Supplier Search, New Suppliers, and Supplier Catalogs.
